

Data sheet of

MRI Oxygen Cylinder set

HO-M11

**Main features:**

- 1, The HO-M11 MRI oxygen cylinder full set is made of non-magnetic material, MR conditional up to 3.0T
- 2, The MR oxygen flow meter with MR oxygen regulator are sold with MR oxygen cylinder and cylinder set as a set

Main Specification:

Manufacturer:	Nanning Hhao Technology Co., Ltd
Model	HO-M11
Product name	Oxygen Cylinder (MR compatible)
Main features	1, Aluminum alloy material, non-magnetic 2, Working pressure: $\leq 14.7\text{Mpa}$ 3, With brass connection valve 4, Capacity: 10L 5, Usage: Refillable
Model	HO-M15
Product name	Oxygen flow meter (MRI compatible)
Main features	1, Aluminum material, the valve is compatible to CGA 540 2, Oxygen flow range: 0-15LPM, calibrated at 50 psi and 70° F
Model	HO-M14
Product name	Oxygen regulator (MRI compatible)
Main features	Plastic back cover, with brass part inside, non-magnetic,
Model	HO-C1
Product name	MRI oxygen cylinder holder
Main features	100% Aluminum alloy structure with 2 plastic castors, non-magnetic, suitable for 10L cylinder
Origin of Country	China
